Unique NFTs

We are putting a BIG focus on our NFT collection. We want to make sure to create a big hype around them and promote them on OpenSea. We will also reward our token holders with some unique NFTs from time to time!

Mini Games

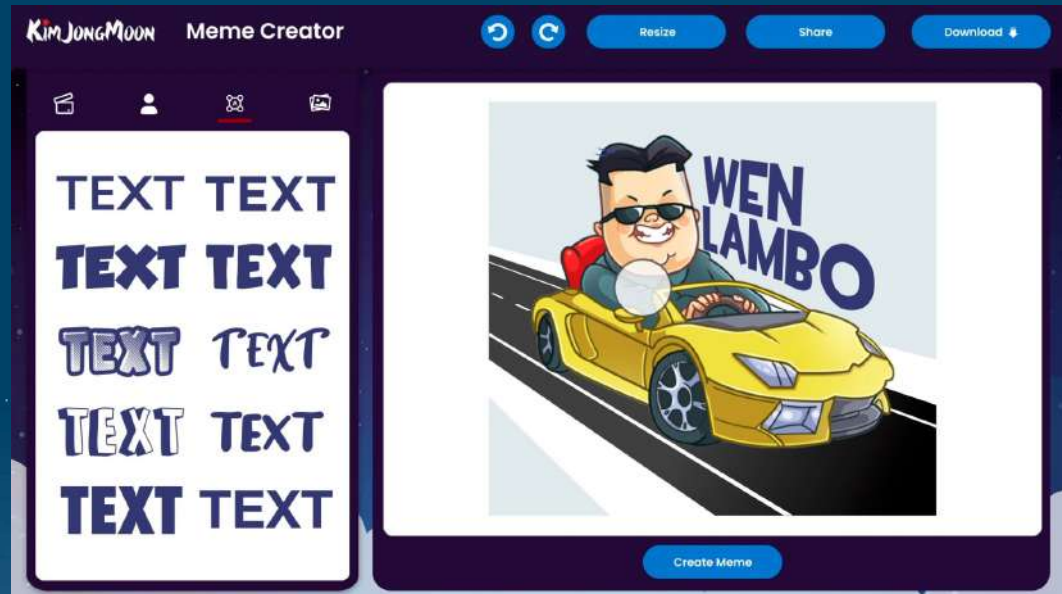

We are working on several mini-games to be added to our website as well as a main blockchain game that will allow investors to earn real \$KIMJs while they play. There will also be competitions that earn them prizes based on a point system.

Meme Builder

One of the projects we are currently working on is a Meme Creator on our website. The creator will enable you to make your own memes in a simple, uncomplicated manner. You will be able to choose our character, in whatever position you desire. Then you can add additional items like coins, sunglasses, different outfits, and much more.

To make it especially user-friendly, the character and items can be easily positioned and arranged via drag and drop. Additionally, you can change the background and then you will be able to choose the text you want and edit it. Once you are all done, you can create an image of your meme and download it.

Merch Store

Get your own KimJongMoon shirts, hats, posters and stuffed animals at our upcoming online store!

Animated Web Series

We are currently working on a pilot that will be used to pitch to big media networks such as Funny or Die and Comedy Central for an 8 to 12 part animated series to be released at the end of 2021!
